

Map Generation Made Easy with MapIT!®

This user friendly, interactive desktop mapping tool puts hard copy map generation into the hands of non-gis personnel. With simple 'point & click' steps, they can quickly produce detailed and/or overview maps.

MapIT! is designed to work seamlessly with RTS - Referral Tracking System. Maps will dynamically display the detailed information on the templates.

MapIT! can be easily customized making it economically and technically feasible to adapt the map templates to individual or community standards.

Benefits and Key Features

- **Produce Maps with RTS Data.**
Relevant information from RTS is incorporated and displayed on your map
- **Pre-Defined Templates**
MapIT! comes packaged with pre-defined templates. Detailed and Overview
- **Modify Templates Easily.**
Additional information that you would like to see added or removed can be done by you! The 'new' template will be available for all future outputs. Users can easily 'revert' to original templates at anytime.
- **'Batch' or 'Step' Printing**
User can batch output the maps or step through each map.
Printing all Referrals for a specific time frame or proponent can be completed in minutes!
- **Supports Multiple Output Formats.**

MapIT! templates can be modified.

- * **Change:** Title , Scale Bars, North Arrows, Legend Format and Content
- * **Add / Remove :** Data layers, text, images, data frames, other supported objects
- * **Presentation:** Orientation, Paper size, Scale
