

RTS – Referral Tracking System

1st Annual Client Gathering and Workshop

Nanaimo, BC

We are very excited to announce that we are planning the 1st Annual RTS client gathering and workshop. These meetings will be a great place for RTS customers to share their experiences with RTS and the processing of referrals in general. It is also a time for us to meet the people we provide support to. We invite you to come and share your ideas and experiences with the rest of the RTS community.

Since the release of RTS, we have received many recommendations from customers on ways to enhance the software. We would like to share these ideas with you and show you some that are already in progress.

Here are a few potential topics we are considering. Please indicate your level of interest in the left hand column (High, Medium, Low) and if there is something you would like to cover, please add it in the additional topic ideas section. Please return this document by fax or email with your preferences.

Level of Interest	Potential Topics
	WIM – Web Interface Module – a method for proponents to enter referrals directly into RTS.
	MapIT! for RTS – produce maps of referrals from within RTS.
	Getting the most out of your system.
	Review future enhancements.
	Your Topic Ideas: <hr/> <hr/> <hr/>

Before we book the meeting facilities, we need to estimate the number of potential attendees. Attendance is FREE for this gathering.
