

# Pocket Phoenix<sup>CE</sup>

- An easy to use, Windows Pocket PC CE-based data collection program.
- An integrated field information manager and data collection tool to be used with Phoenix Professional
- Transfer Block info to handheld and add notes and activities on site.
- Data synchronization with Phoenix<sup>Pro</sup>
- Compatible with all Windows CE Pocket PC (Mobile 2003 and 2005) handhelds.

Take your Phoenix<sup>Pro</sup> data into the field! Use it to not only review your Obligation Summary information, but also edit and add activities, opening comments and then synchronize the data back into Phoenix<sup>Pro</sup>.

The Phoenix<sup>Pro</sup> synchronization module transfers data to and from Pocket Phoenix and also makes the Phoenix<sup>Pro</sup> Master Activity List, Data Entry Rules and Master Comments available to the Pocket PC.

## Benefits of Automating - How to do more with less.

### Reduce office time

Automating with Pocket Phoenix is the best way to do more with fewer people.

**Maintain Data Standards** – The system utilises the same tables used in Phoenix<sup>Pro</sup> for field validation, thereby promoting corporate and operational standards.

### Features

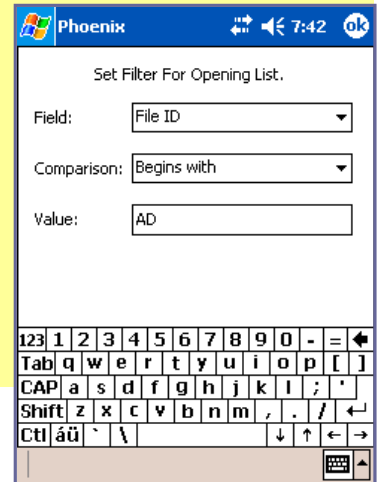

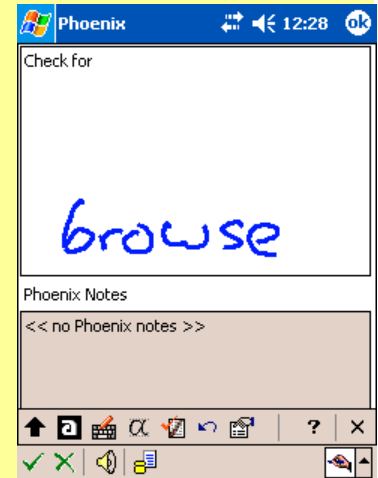

Type notes by using:

- the virtual keyboard to type notes
- the handwriting recognition function
- the character recognition function, or
- Voice Capture Or, "Talk to your handheld" - capture your voice as notes, then play them back both on the handheld and in Phoenix<sup>Pro</sup>.

### Extensive Validation for Activities

**Canned notes** – reduce your data entry time by using "Canned Notes" from your Phoenix<sup>Pro</sup> PC database

**Synchronization** – The Phoenix<sup>Pro</sup> – handheld synchronization process makes for easy data management and reduces data verification and administrative time.
